

The solar panels on the roof were from Sun Source Energy Products. They put together a package for us with the temperature sensors and controller as well as the automatic valve which switches based on the temperature of the pool and a sensor on the roof. I recommend you call (973) 691-6911 ask call them to help plan your system. We intend to add a third 3X8 panel.

Equipment list:

- Pentair Intellichlor Salt Chlorine Generator Medel IC15
- Hayward Aqua Solar electronic solar control
- Aquatherm solar pool heating panels
- Pentair Superflo VS variable speed pump model no. 342001
- Hayward ColorLogic LED lights
- Hayward Transformer for lights
- Hayward PSV series valve for solar heat diversion

The pump was purchased on Amazon and the rest of the equipment from a pool supplier.
